Mekong Quilts
Non-Profit Organisation

DECEMBER 2018, ISSUE NO. 1

THANK YOU FROM MEKONG QUILTS

Handmade products by women we support in Cambodia and Vietnam

A gift that gives twice

Christmas is coming and we are counting to the last seconds in 2018 and say welcome to 2019 with a couple of great hopes. During the past 2018, Mekong Quilts is honorably happy and greatful to all of you - our valued and loyal customers by your tenacious encouragement and devotement so that we can enthusiastically improve our product quality and especially our main mission - to create the sustainable employment to women in rural Vietnam and Cambodia that we have built since 2001.

From the bottom of our hearts, we respectfully appreciate your precious love to us. This is actually the vital part to our forthcoming years. We wish you and your beloved a Merry Christmas and Happy New Year!

Yours truly,
Mekong Quilts

A PLASTIC-FREE CHRISTMAS?

Let's think about environment even during Christmas season!

Have you heard about a dead sperm whale with nearly 6 kg of plastic waste inside its stomach drifted on Indonesia shore recently? As you know, the paper can decay but the plastic is not! So, what about using the eco-friendly such as bamboo, papier-mâché or water hyacinth?

At Mekong Quilts, creating environment-friendly products from local materials is always our priority. This Christmas, we are really proud to present you from the meticulous water hyacinth Christmas trees to exquisite papier-mâché stars and many other ornaments made from fabric and bamboo. All of them are handmade with love by our women-artisans. You can feel that each corner of your home will look brighter and fresher. The more nature products, the more meaningful Christmas season!

Your perfect Noel ornaments await!
