QUILT CARE

WASH Cotton quilts can be machine, hand washed or dry-cleaned. For machine or hand washing, use a delicate cycle with cold water and mild detergent in a laundry bag. For small stains, use a small amount of dishwashing liquid mixed with equal parts water and rub gently into the spot and rinse out. For silk/taffeta quilts, dry-clean ONLY. Use a reputable dry-cleaner.

DRY Lay quilt flat on a clean sheet in a shady area. Quilts can be dried in a dryer on low setting if required.

STORE Quilts can be stored folded and wrapped in acid free tissue paper, or rolled and placed inside a cotton pillow-case. Occasionally air the quilt so that it has room to breathe.
