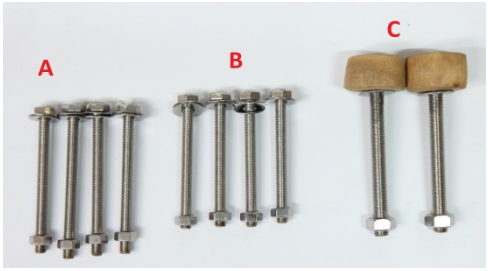
BAMBOO HAMMOCK STAND
ASSEMBLY INSTRUCTIONS

EQUIPMENT REQUIRED

2 x spanners (size 12, 13)



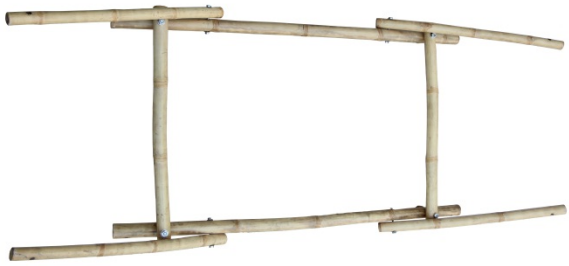
HAMMOCK BASE COMPONENTS

Check that all components are included.
Nuts/Bolts:
- 8 pcs of nut **[A].** (*4 pcs connected already)
- 4 pcs of nut **[B]**
- 4 pcs of nut **[C]** (*2 pcs connected already)

Total = 16 pcs

*NOTE: The base sets are already semi-connected by 4 nuts **[A]** & 2 nuts **[C]**.

Bamboo bars:
- 2 V bar sets (with S hook) (1)
- 2 sets to build the base (1 long base, 1 medium base and 2 short brace bars/ each set). (2)

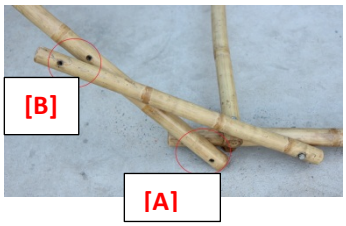


Step 1: Build the base

- Assemble the base by putting the longest base bars to the ground*, the short brace bars should be on the sides.
***Note:** the round bamboo stopper of the already connected nut **[C]** should be touching the ground

- Using the remaining nuts **[C]** (2 pcs) connect the 2 medium base bar ends that are not connected to the other side of the long base bar. (As shown in picture)

- Ensure the numbers match at each joint.



<u>Step 2:</u> Connecting the V bars to the base

- Place the V pole (with S hook at the top, facing inwards) upright and attach to the base, using nuts **[B]** (4 pcs to connect to the top of the brace bar) and the remaining nut **[A]** (4 pcs to connect to the bottom of the long base bar) **as pictured.**

- Ensure the numbers match at each joint.

<u>Step 3:</u>

- Tighten all nuts/bolts with spanner size 12 & 13.

FINISH
